

# Bio Blocks

## Biological Channel Blocks

*Bio Blocks digest organic urine crystals rapidly, keeping urinal drain lines running freely. They are perfumed to provide a pleasant fragrance in the washroom. Unlike traditional urine blocks, Bio Blocks do not contain pDCB, recognised as being both carcinogenic and a water pollutant.*

### KEY PROPERTIES

Bio Blocks contain biological enzymes to digest urine crystals and a perfume to provide a pleasant fragrance in the washroom.

Unlike traditional channel blocks they are pDCB free. (pDCB is recognised as being a carcinogenic material and a water polluter).

NB. When using Bio Blocks avoid the use of bleach or caustic/alkaline based cleaning chemicals as these will affect the performance of the Bio Block  
(We recommend the use of Bio Clean as a Bio Block compatible cleaning chemical).

- Biological
- pDCB Free
- Pleasant Fragrance

### APPLICATION

- Place in urinal troughs approximately 40cm apart.

### PACKAGING

Tubs of 50 blocks

### SAFE HANDLING

Store in original containers and avoid extremes of temperature.
